2012–2013 Tax Planning Tips and Reminders

Tax Loss Selling: Consider selling unprofitable securities and using the realized losses to offset capital gains realized in the current year.

Capital losses in excess of capital gains in a given year may be carried back for three years or carried forward indefinitely.

Note: In order to claim a capital loss on the disposition of a security, you should make sure that the loss is not a *superficial loss*¹.

Pension Income Splitting: Consider allocating up to 50% of *eligible pension income*¹ with your resident spouse/common-law partner for income tax purposes.

Other income splitting opportunities may include:

- Making contributions to a spousal RSP.
- Paying a reasonable salary from a family business to family members for actual services rendered.
- Gifting cash to your spouse/common-law partner and/or adult children to contribute to a tax-free savings account (TFSA).
- Investing Child Tax Benefit and Universal Child Care Benefit payments in an account for your children.
- In order to maximize the spousal tax credit, consider electing to transfer taxable Canadian dividends to a spouse/common-law partner.

Maximize Your Tax Credits and Deductions

- Take advantage of all available tax deductions and credits available to you to reduce your personal and household tax bills.
 For example:
- Annual union, professional, or like dues
- Child care expenses, children's fitness and arts amounts
- Charitable donations
- Foreign tax credits
- Investment counsel fees and interest expenses.
- Medical expenses
- Public transit passes
- Safety deposit box fees
- Tuition and education amounts
- Pension income amount
